# Hayes New 65 Day Roasting Ear Corn

In introducing the New Variety of Roasting Ear Corn, we do not hesitate to say it is one of the very earliest now grown, and you can get corn for your table in about 65 days from planting. While this corn is not a true sweet corn, you can hardly tell the difference. It is far ahead of the Early Adams Varieties. The ears are from 8 to 10 inches long and have two to three ears to the stalk. The picture here shown is a true photograph of an ideal ear of this Grand New Corn.

We have only a limited amount of this corn for sale this season, so send us your order at once.
